

# **RUNE PROJECT CALL**

## **REQUEST FOR FINAL OFFER for optical fibre cables**

### **Questions and answers V1\_23042019**

April 2019

---

**QUESTION N.1**

---

Is it possible to get an editable electronic version of the Supply Agreement for Materials document?

**ANSWER**

The editable version of Supply Agreement for Materials is published on [www.ruralnetwork.eu](http://www.ruralnetwork.eu). But please note that **you do not need to fill it in and must not change it** in any way. All changes of any document (except the excel file) will result in the elimination of the bidder from the bidding process.

**QUESTION N.2**

---

Is the Supply Agreement for Materials also available in Slovenian and Croatian languages?

**ANSWER**

No, the document is only available in English. We are aware that Building contracts will have to be provided in national languages, but the Supply agreement is not meant to be an integral part of the building contract.

**QUESTION N.3**

---

Can you please send us the BIC code?

**ANSWER**

Each bidder has received a BIC code which was stated in the subject of the RFFO invitation email.

**QUESTION N.4**

---

In which language do we have to submit the SUPPLIER'S GUIDELINES AND/OR INSTRUCTIONS FOR HANDLING AND INSTALLATION?

**ANSWER**

The Guidelines must be submitted in Slovenian AND Croatian languages. Alternatively, the Guidelines can be submitted in English but the Supplier will be held responsible for any potential damages or defects of installed products deriving from language-based misunderstandings on the installer's side.

The Guidelines must be translated into Slovenian and Croatian languages latest before the first delivery.

**QUESTION N.5**

---

Are flat cables (ADSS 12J,24J) acceptable in this tender?

**ANSWER**

No, flat cables are not acceptable, only round cables are.

**QUESTION N.6**

---

EU certificate for in-building installation must be provided – what kind of the certificate is required?

We assume this concerns CPR certificate, so please provide us with information which euroclass of CPR is required for this cable? Of course in accordance with KE 305/2011 - CPR (Construction Products Regulation) directive.

**ANSWER:**

We require Euroclass C<sub>ca</sub> and the following performance levels of the additional criteria:

	<b>Performance level</b>	<b>Meaning</b>
<b>Smoke production</b>	s1b	Low + light transmission > 60%
<b>Flaming droplets/particles</b>	d1	Few
<b>Acidity (pH and conductivity)</b>	a2	Limited

**QUESTION N.7**

Please check "96F G.657 ADSS with minimum 80m span in heavy load" requirements.

<b>Item</b>	<b>Contents</b>	<b>Value</b>
		96
Structure	Type	1+5

It should be 1+8, not 1+5.

**ANSWER**

You are correct. There was a typo on our side, it should be 1+8.
