

RUNE PROJECT CALL

REQUEST FOR FINAL OFFER for ducts and duct equipment

**Questions and answers
15052019**

May 2019

QUESTION N.1

What will be the delivery places for the ducts and duct equipment?

ANSWER

We cannot give exact locations at this time but it will be destinations within 50 km from:

- Nova Gorica, Kranj, Novo Mesto, Celje and Murska Sobota (all in Slovenia),
- Pazin and Opatija (both in Croatia).

QUESTION N.2

In the specification it is mentioned that we have to offer coils (without drum). Is there a chance to offer the ducts on a drum or is a coil mandatory?

ANSWER

We prefer the ducts without drums. However, ducts on drums are acceptable if this reduces the price.

QUESTION N.3

In RUNE RFFO DUCTS Appendix 2 min. technical specifications 26042019 in 1.2 Reference, table 2, your required weight (g/m) is much bigger based on the standard for production of PE ducts. For example – PE duct 16/12 mm is required weight of 132 g/m but based on the standard DIN 8074:2011 weight for this duct is 92 g/m. Please send give the explanation for this request.

ANSWER

Please read the requirement as maximum weight.
